Project: Juneau Access, Glacier Highway Extension Lynn Canal

Comment: This is the most important project within the STIP. This highway will enhance the flow of people and commerce between Southeast Alaska and the interior of Alaska, Southeast Alaska and the Yukon, and Southeast Alaska and the contiguous 48 States. This highway extension will allow greater flexibility within the Alaska Marine Highway System by allowing resources to be utilized elsewhere once the highway is completed. This is the only project I am commenting on, it is that important.
